

INTRODUCTION

The French government introduced a financial program for individuals post-cancer treatment in 2020, for three eligible supportive cares : nutrition, adapted physical activity, and psychological support. Since 2021, the Regional Health Agencies (ARS) has to label care structures to offer this program with the support of Dispositif Spécifique Régional du Cancer (DSRC) OncoPaca-Corse.

METHODS

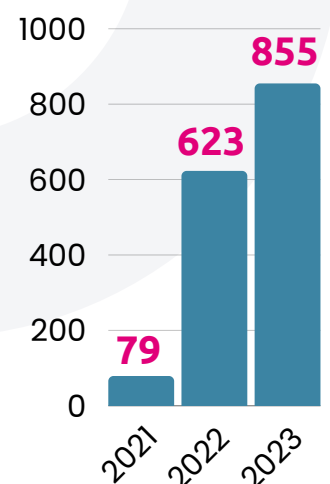

2021 : first call for projects from ARS PACA to label care structures.

2022 : second call for projects from ARS PACA and getting feedbacks from the initial wave of labeling ; first from ARS Corse.

Implication of the DRSC :

- ▶ Support for the selection of care structures, organization of a seminar for all the care structures
- ▶ Communication campaign for professionals and patients (flyers and patient information posters, digital communication, press articles ...)

RESULTS

In 2022, 11 new structures were labeled, bringing the total regional offering to **32 structures in PACA and 3 in Corse**. The number of treated patients increased from **79 in 2021 to 855 in 2023**. 21 out of the 23 structures labeled in 2021 participated in the 2022 experience-sharing seminar (participation rate 91%)

Feedbacks highlighted :

- **professionals needs and expectations**, confirming an interdisciplinary and multiprofessional dynamic around the program;
- **persistent barriers** include relatively restrictive eligibility criteria and administrative, financial, and organizational constraints
- **communication gaps** to the public and **lack of collaboration** among health professionals

CONCLUSION

The substantial increase in the number of treated patients, albeit in proportion to eligible patients, underscores the need to continue implemented actions in the region. In 2023, DSRC initiated a social media campaign for health professionals and patients, and a second seminar in May 2023 provided an opportunity for further learning from experiences. **Beyond expected direct benefits for patients, the rise in inclusions could foster the sustainability of the program's funding.**
